# Peridot Jewelry

**Peridot Gemstone is a heart-flattening olive green gemstones that glimmers in golden shine and tint when viewed from different angles under light. Its shade ranges from olive to dark green because of the presence magnesium-iron silicate in its composition.**

# Moldavite Jewelry

**Include the Moldavite gemstone in your life to grab the enchanting benefits of various planets of the universe. As the crystal is believed, the creativity of meteoroid collation occurred around 15 million years ago in the Czech Republic. It is a forest green and olive green colored gemstone that rates between 5.5 to 7 on the Mohs scale hardness.**

# Moonstone Jewelry.

Moonstone crystal is a variety of feldspar mineral groups that are formed from the orthoclase and albite silicate minerals. The gemstone is an opalescent and translucent crystal in its appearance and can be found in colors of blue, pink, white, gray, and many more. The actual meaning of the moonstone is feminine energy and fresh beginnings for its users.

# Opal Jewelry

TODAY'S REMINDER

Opal- Welcome good fortune and live a lavish lifestyle by wearing colorful and polished Opal Jewelry. Due to its mesmerizing play of colors, its famous as the 'Queen of Gems.'
