ANT PEST CONTROL ADELAIDE SA

Even if there's no noticeable demand for **ant pest control Adelaide**, our Precision Pest Control services will give you peace of mind—at the very least. That's because whether you're buying or selling, ant and other pest infestations can be detrimental to the value of your home, particularly termites, which affect up to 130,000 Australian homes every year. The worst part is you often don't even know about their presence until it's too late, which is why we recommend regulated pest inspections to give you a head start. Our team have experience and expertise in various types of pest management, including cockroaches and spiders. While there are plenty of products on supermarket shelves, they're often ineffective and saturated in chemicals that aren't designed to combat the specific pest that's ruling your home. Our professional team offer tailored ant pest control Adelaide solutions to resolve your problem with our disrupting daily movements.

TERMITE CONTROL ADELAIDE

Have you ever considered booking a **termite inspection Adelaide**? Let us tell you a bit about our service. Termites are one of the biggest burdens on homes across Australia; causing \$780 worth of damage every year. To ensure your home isn't amongst the hundreds that get destroyed, it's important to invest in reliable pest control! This of course starts with a comprehensive termite inspection Adelaide, which is our speciality at Precision Pest Control. Our fully licensed inspectors will undertake a full assessment of your property before coming back with a report. With years of experience to back our work, you can rest assured that we'll leave no stone unturned. We also used advanced thermal imaging technology, which has significantly improved our ability to detect the presence of pests in your home. Call us for your **pest control Adelaide** on 0402 682 738!

TERMITE TREATMENT ADELAIDE

Seeking **termite treatment Adelaide** as soon as you suspect a problem is crucial before it becomes a bigger problem. But what exactly are termites and what's so bad about them? Termites are small insects that destroy wood. While many homeowners do not consider them a large threat, termites are actually extremely common in Australia. Did you know that termites cause a staggering \$780 million dollars' worth of damage each year? Although termites are small, they can cause extreme structural damage to your home such as on the support of your beams, floor joists, posts, ceilings and wall studs. If you suspect there is termite damage on your property, chances are that there is more damage underneath your house. In addition to wood, termites can also feed on plaster, metal and insulation. So, don't wait until it's too late – enquire about termite treatment Adelaide today.
