

Split System Installation Adelaide

Stress-Free Split System Installation In Adelaide

Split system installation in Adelaide is simple and easy to do with our specialists. However, choosing a less reliable provider may cause the job to go sideways. Poorly installed units are quite common to experience from inferior providers. To avoid this unnecessary stress, it's important to choose a reliable and trusted installer. From the initial consultation to the final touches of the job, Thompson Air guarantees to offer unmatched solutions fit for you.

Where To Put Your Indoor And Outdoor Units For A Split System Installation In Adelaide

The location of internal and external units is vital to maximizing the benefits of having a **split system installation** in your **Adelaide** home. So, before our technician arrives at your home, it's important to decide where you will place the units. Ideally, the indoor unit should be placed where airflow can be distributed without interruption. Mounting it onto your wall at least eight to ten feet is ideal to have easy access during cleaning and maintenance. If you're installing it in a bedroom, it's best to mount the indoor unit directly above the bed to maximize the cooling effect.

Add Value And Comfort To Your Home With A Split System Installation In Adelaide

While other Adelaide homeowners and commercial spaces invest in other interior projects, getting a **split system installation** should be a priority. This is because installing a high-quality air conditioning unit can add value to any property. In addition to that, it promotes comfort in performing tasks, hence, increases productivity.
