# What is PPC Advertising?

Pay per click (PPC) advertising is a form of online advertising in which businesses pay a fee each time someone clicks on their ad. This type of advertising is often used by search engines. But it can also be used on other websites and platforms.

How Does PPC Advertising Work?

A list of adverts that are relevant to the search phrase is displayed when someone types a keyword into a search engine. The keyword that was searched for, the advertiser's bid for the phrase, and the quality of the ad are only a few of the criteria used to rank the ads.

How to Get Started with PPC Advertising

There are a few things that businesses need to do to get started with PPC advertising:

- Create a Google Ads account: businesses need to create a Google Ads account in order to start running PPC campaigns.

- Choose keywords: businesses need to choose keywords that are relevant to their products or services.

- Set a budget: businesses need to set a budget for their PPC campaigns.

- Create ads: businesses need to create ads that are relevant to their keywords and that will encourage people to click on them.

- Track results: businesses need to track the results of their PPC campaigns so that they can see how they are performing and make adjustments as needed.
