DENTURES SPECIALIST IN MELBOURNE

Are you looking for a denture specialist in Melbourne to help you improve your smile? You have come to the right place. Abstract Arch Denture Clinic restores smiles through personalised services, expert care, and quality craftsmanship. The owner, Gregory Nash, is a distinguished and qualified dental prosthetist, passionate about offering the highest quality of care. Gregory has over 30 years of experience restoring the smiles of North-East Melbourne residents.

We focus on providing durable oral health by replacing missing teeth with dentures. Our dental dentures are comfortable, enhance your appearance, and are functional. Gregory has a keen attention to detail and can create dentures with a natural appearance. We use high-quality artificial teeth with modern technology. Gregory will guide you through the teeth replacement process to ensure you regain your natural smile and confidence. Abstract Arch Denture Clinic partners with Select Smiles for other dental procedures or investigations that may be required. We are independently owned and a member of ADPA.

TYPES OF DENTURES OFFERED AT OUR MELBOURNE CLINIC

Dentures are removable and cost-effective prostheses that replace missing teeth. Technology has made it possible for dentists to provide natural-looking and comfortable dentures. The process of developing, fitting, and adjusting dentures is a straightforward one. However, the quality varies between dentists. So, working with our denture specialist in Melbourne is essential. Our team offers full, partial, and implant-retained overdenture solutions for missing teeth.

Full dentures replace all your missing teeth. They use the gum and tissue in your mouth to hold them in place. Partial dentures use the surrounding teeth to keep them in place. So, they are only as good as the neighbouring teeth. Implant-retained overdentures are anchored directly into your jawbone to provide a stable and visually appealing replacement for missing teeth. Our team will help you regain the shape of your mouth with our innovative and detailed solutions. We assist patients of all ages, from young to old.

VISIT OUR MELBOURNE CLINIC FOR QUALITY DENTURES

Dentures are simple removable plates that form natural-looking false teeth. They are simple to remove, clean, and care for and offer a confident go-to solution for missing teeth. Partial dentures replace broken or missing individual teeth, while full dentures replace all your teeth. We design our dentures so that you can chew food and improve your smile. Our dentist knows that each patient is unique. So, we uniquely create our consultations and denture solutions with unrivalled attention to detail.

Our experts will provide care instructions to ensure your dentures remain clean and functional. Quality oral care will also ensure you have healthy gums for the longevity of your dentures. We can also help you with emergency repairs. Our team utilises the latest denture technology to create attractive aesthetic solutions for your smile. Our goal is to improve your confidence and health by offering solutions that reduce future damage and risk.
