FEATURES

LOYALTY

Customizable loyalty program which lets guests stack points while enjoying a meal at their favorite eateries. A fun way to keep guests wanting to come back for more.

INCREASE TIPS

Choose to use a pre-configured tip or enter a custom value to help increase your average tip. With Intuitive tipping, guests can choose pre-configured tips in dollars, percentage based, or enter a custom value.

CUSTOMER MARKETING

Use customer data for future marketing purposes including targeting customers with more benefits and offers.

CONTACTLESS ORDER AND PAY

Guests can simply scan and pay using their own mobile device through a QR code displayed on the Customer Facing Display.

REDUCE ORDER ERRORS

Enabling guests to view their order in real-time helps reduce errors thereby adding to a better customer experience and higher profits.

DIGITAL RECEIPTS

Be eco-friendly and save on costs with digital receipts. Guests provide contact information directly into the CFD and receive a digital receipt via email or text.

Discover dynamic ways to control the guest ordering and checkout experience. From paying with cash or contactless payment, customers have the ability to choose the option that works best for them.
