FEATURES

PREP STATION ROUTING

Easily direct tickets to their appropriate stations, or revenue centers. Multiple kitchen displays can be synced and have real-time updates across different stations in the kitchen.

MULTI-LINGUAL SUPPORT

Supports multiple languages to support employees understand data in their native language.

SAVE ON PRINTING

Go digital and save money on paper, printer ink, and other costs. Choose the hardware that fits your needs, and let the technology pay for itself right away. Seamlessly connect your KDS to your kitchen printer(s).

KITCHEN GRADE HARDWARE

Enabled and tested on heat-grade hardware built specifically for hot and greasy kitchens.

SEAMLESS CONNECTIVITY

Connect to the eatOS food service eco-system, including the Point of sale, Self-service kiosk, Mobile app, Online ordering, Delivery apps, and more. Designed to work offline so the kitchen does not have to worry about internet down time.

ANALYTICS AND REPORTING

Cloud-based analytics to view sales, refunds, voids, food costs and more in real time. Make more informed decisions to help run kitchens more efficiently and profitably.

Improve back of the house efficiency, reduce communication gaps and increase profitability by utilizing real-time insights and analytics.
