FEATURES

GPS TRACKING

Reduce costly payroll mistakes with a smartphone app with ability to clock in, clock out, send notifications when breaks are taken, show a payroll summary, let employees swap schedules, apply for leave and more. GPS enabled for accurate location based tracking.

TIME TRACKING ALERTS

View clock-in and clock-out data for employees as it happens. Get notifications for when employees do not take mandatory breaks, work overtime or do not clock-out at the end of their shift.

SCHEDULING

Comprehensive workforce management calendar to easily build, manage and approve schedules, time-off requests and vacation requests.

EMPLOYEE MANAGEMENT

Easily access and manage employee data including profiles, payroll information, shift data, birthdays, anniversaries and more. Automatically set employee status and time-off allowances.

PAYROLL

Build and export payroll data to multiple data sources. Features include in-app payroll management, payroll summary and export to Excel, CSV with API Integration to any third party payroll software.
