Restaurants Made Simple

REPORTING & ANALYTICS

Make real-time decisions with cloud-based analytics. Get reports on sales data, refunds, voids, labor costs and more across email, text, website, third party software or mobile app anywhere, anytime.

Real-Time Data

Cloud Reporting

Multi-Device Support

Practical Insights

Multi-Location Reporting

Self-Service BI Reporting

FEATURES

REPORTING AND ANALYTICS
Powerful analytics engine helps make informed decisions with real-time insights. Build customized reports across all data points, automate reporting into multiple platforms including API calls to third party software, email, SMS, and in-app notifications.
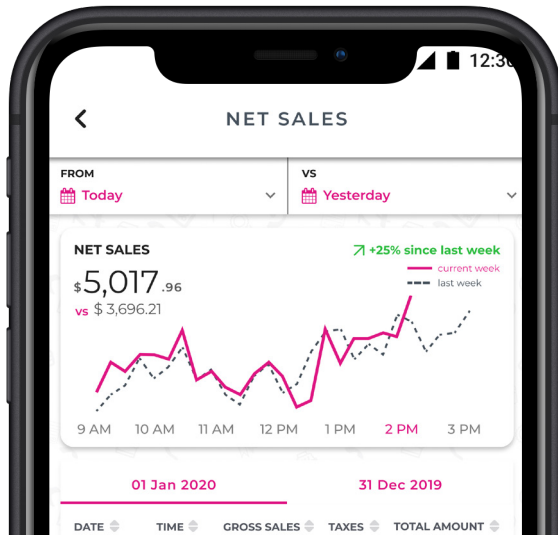

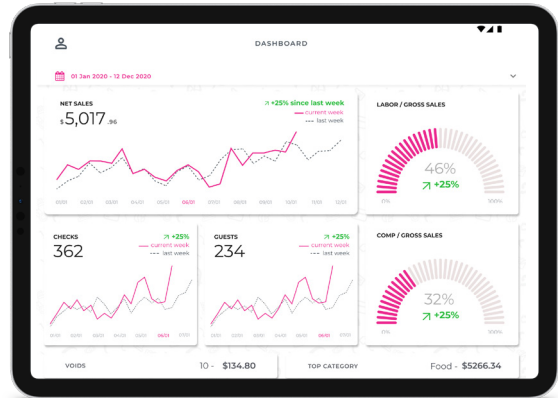

CLOUD REPORTS
Access data from the Point-of-Sale, dashboard or the analytics app on any device in real-time. Free up time for management and increase efficiency and profitability.

MULTI-LOCATION REPORTING
View detailed reports of each location separately or an overview of multiple locations. Filter the results and control who has access to the information.

PRACTICAL INSIGHTS
Real-time insights with information on different data points enabling cost savings, increasing efficiency, improving business and customer experience.

REAL-TIME DATA
Make decisions quickly using real-time insights and enable informed decisions based on actionable data.
