BIODEGRADABLE PLASTIC BAGS UAE

As the world has become more aware of the myriad environmental issues associated with plastics, progress has been made in the creation and usage of biodegradable plastics. Plastics that degrade naturally in the atmosphere are known as biodegradable plastics. Biodegradable plastics have a structure that allows natural microorganisms to break them down quickly, resulting in a less toxic end product. As a result, biodegradable plastics are thought to be more environmentally friendly than standard plastics due to their obvious environmental benefits. Therefore, biodegradable plastic bags are promoted as being more environmentally friendly than conventional plastic bags because they degrade into harmless material more easily.
