# TEETH SCALING NEAR ME

Maintaining oral health requires routine visits to your dentist. Even though you brush and floss, plaque still builds up in areas that are difficult to reach with your toothbrush alone. Your dentist is an expert at cleaning teeth and will give you teeth a good “scale and polish.” Dentists have all the equipment necessary to remove plaque gathered. They are experts who have specialized training in preventative oral care. At Shield Medical Center, we use the Guided Biofilm Therapy (GBT) technique that uses EMS Airflow Swiss Technology . Guided Biofilm Therapy is a cutting-edge, minimally intrusive method of dental prophylaxis and maintenance that gives a kinder, more thorough clean for the teeth and gums.
