Onlive Infotech
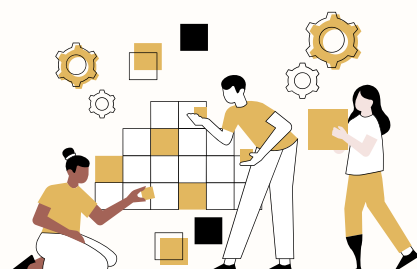

UKRAINE VPS SERVER

1 About

A Ukraine VPS (Virtual Private Server) is a type of hosting service where a physical server located in Ukraine is divided into multiple virtual servers.
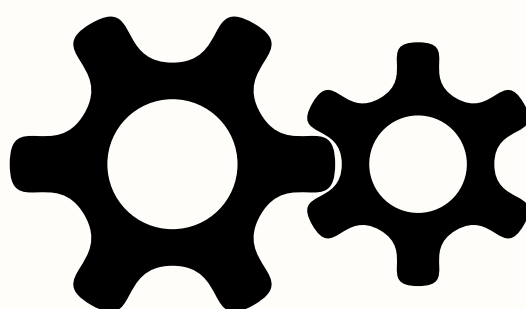

2 Performance

With dedicated resources, your website or application can handle higher traffic and perform better compared to shared hosting.

3 Control

You have root access to the server, allowing you to install and configure software as needed.

4 Scalability

Easily upgrade your resources (CPU, RAM, storage) as your needs grow.

5 Security

Enhanced security features to protect your data and applications.
