

F1 Sweet Corn Seeds – High-Yield Hybrid Varieties Loved by Indian Farmers

If you're searching for reliable, high-yield **F1 sweet corn seeds**, IRIS Hybrid Seeds offers some of the best options tailored for Indian climates and farming conditions. Whether you're a commercial farmer or a home grower, IRIS's curated collection of F1 hybrid sweet corn seeds ensures excellent sweetness, robust plant growth, and consistent performance across seasons.

Recently, a farmer from Gujarat shared how the **F1 SWEET CORN HONEYMAX** variety transformed his yield. With a plant height of 220 cm and fruit weight of around 550 gms, the

ears matured within just 72–75 days. The sugar content was an impressive 13–14 Brix, making the corn highly marketable for its rich, sweet taste and golden-yellow color. “The tip filling was perfect and the plants were vigorous – it’s now my go-to variety,” he said.

IRIS also offers other standout varieties such as:

- **F1 SWEETCORN AMERICAN EAGLE** – known for its 14–15 Brix sweetness and fruit weight of up to 650 gms.
- **F1 SWEETCORN SWEETY 27** – matures in 72–78 days, great for balanced sweetness and resilience.
- **F1 SWEET CORN COLA CRUNCH** – a unique red corn with 14 Brix sweetness and eye-catching appeal.
- **F1 SWEET CORN CUSTARD CORN** – a bicolor yellow and white variety with a thin pericarp and early maturity.

All IRIS hybrid sweet corn seeds are developed to be disease-resistant and high-performing. These seeds are ideal for those looking to achieve superior quality and profitability with every crop cycle.
