

DRIVER AND PASSENGER FACE IMAGING

Comprehensive video imaging of vehicles by Inex includes the capability to capture faces through the windshield, which is integral to various solutions:

- **Traffic Enforcement by Counting Vehicle Occupants**

Capturing driver photographs provides an record of the driver's identity for toll or traffic violation enforcement.

- **Automated Border Control by Knowing Who's Inside Cars**

High-quality imaging of drivers and passengers aids in identity verification against stored records. Integrating this feature with services like the USA CBP Traveler Verification Service (TVS) facilitates automated checks at border control points.

- **HOV/Carpooling Monitoring by Counting Car Occupants**

Video imaging detects the presence of passengers, supporting HOV regulation enforcement, driver photograph retention for violations, and carpooling incentives.

- **Secure Vehicle Access Control by Verifying Vehicle Occupants**

Video imaging verifies the identities of drivers and passengers entering secure areas, either by a remote visual security check or via facial recognition systems.

- **Secure Rental Car and Fleet Operations by Recording Photos of Car Occupants**

Capturing driver photographs at facility exits provides a forensic record in the event of vehicle theft.

Supporting these applications, Inex offers the IZA500GDFC **Driver Face Camera**, which provides:

- **Reliable All-Weather Capture**

Functions effectively under all lighting conditions.

- **Advanced Imaging Techniques**

Uses multispectral imaging and specialized illumination from ALPR technology to capture clear images through windshields at any time of day.

- **Simultaneous Capture of Faces and License Plates**

Records images of both driver and passengers, along with license plates, linking vehicle occupants in a single transaction.

- **High Compatibility**

Image quality and resolution are compatible with commercial facial recognition systems.

- **Integration Capability**

The camera integrates seamlessly with common Access Control and Video Management systems for persistent image storage.
