WATER STORAGE TANKS UAE

Polycom is a prominent supplier of horizontal water tanks in the UAE. These tanks are versatile and can be utilized for various purposes, including fuel storage, oil production, refining, and other manufacturing applications that require robust technical infrastructure. They serve not only to store a variety of liquids but also to measure the volume and distribution of the petroleum products contained within. Depending on the internal coating, these tanks can accommodate both lightweight and heavy oil products, as well as chemicals, food products, lubricants, and water. Additionally, they can function effectively as fire tanks.
