

## Revolutionize Your Material Handling with Superlift's Power Tugger

Efficiency and safety are essential to successful material handling in today's ever changing environment. Superlift Material Handling knows the difficulty businesses have of moving heavy loads. That's why, when it comes to ergonomic material handling equipment, we're proud to provide the full line which includes our new power tugger configuration. It is a versatile tool that is intended to make work smoother and make doing things more productive in numerous industries.

### The Power of the Power Tugger

Any business that needs to move large materials around the warehouse, manufacturing plant or distribution center must have a power tugger to get the job done. While traditional manual tugs are still around, our power tugger greatly cuts down on worker strain, provides much increased material transport speed and efficiency. Because of its ability to effortlessly pull loads, it literally changes the way you move heavy items to focus on other critical aspects of your operation.

We at Superlift know that no two lifting and handling requirements are the same. That's why we engineered our power tugger to be adaptable to a wide variety of applications, including the transportation of pallets, carts and trailers. From 500 lbs, to as high as 100,000 lbs, available load capacities, our equipment is ready to take on the most difficult jobs.

### Ergonomic Design for Enhanced Safety

To maximise employee welfare, our power tugger was engineered with the focus on safety. Moving heavy loads often, traditional manual handling can cause injuries and even worse, fatigue. These risks are minimized by the power tugger because operators can move material without excessive physical effort. Definitely helps protect your workforce but along helps improve your overall productivity.

Intuitive features and an operator friendly design make Superlift's power tugger easy to operate in tight spaces and through complex environments. The design cuts out the risk of accidents and injuries so that your team can perform their tasks safely and efficiently.

# Comprehensive Range of Material Handling Solutions

As Superlift Material Handling, we supply one of the most comprehensive lines of ergonomic equipment on the market today. Aside from our power tugger, we offer lift tables, lift carts, upenders, electric carts, stackers, pallet trucks, skid lifters, work positioners and custom equipment. An extensive range means that you're sure to find everything you need for your material handling operations.

Now if you are unsure which hoist to choose, our application specialists are available & will be ready to help you develop the correct solution to your particular lifting application. If you need help picking out the right equipment or have ergonomic issues, our knowledge team is at your service. We'll work with you to find the best solution for your business & you'll love our positive attitude.

## Conclusion

Superlift's power tugger is the perfect solution for businesses who want to improve their material handling processes. Efficiency meets safety and ergonomic design to change how you can move heavy loads.
