

## Enhance Your Material Handling Efficiency with Superlift's Heavy Duty Scissor Lifts

Efficiency and ergonomics are key to maximizing productivity and worker safety in the world of material handling. We know these needs and our collection of ergonomic material handling equipment such as our heavy duty scissor lifts, can provide what businesses need. As a leader in our industry, our dedication to quality & customer satisfaction now allows us to offer solutions that will make lifting, tilting, rotating, upending, moving, extending or lowering your products a breeze.

### A Comprehensive Range of Equipment

One of the most complete lines of equipment in the industry for Superlift Material Handling meets a variety of different lifting and handling needs. Among our product offerings are lift tables, lift carts, upenders, electric carts, stackers, pallet trucks, skid lifters, work positioners and a number of custom designed equipment. We have the right equipment; whether you are looking for light duty solutions to some task or have an extra heavy duty application.

Notably, our heavy duty scissor lifts do the trick. These lifts are designed to handle a large load, capable of the capacity from 500 lbs to as much as 100,000 lbs. This allows a wide range called a wide range of industries such as manufacturing to warehousing where heavy lifting is a daily part of a job.

### Built to Last

A hallmark of Superlift products is durability. The fact is we know material handling equipment needs to stand up to the ruggedness of difficult applications. That's why we build our heavy duty scissor lifts and every other piece of equipment to last awhile, so you get the best return on your investment. The testing of each product is to the highest safety and quality standards to provide you with peace of mind when purchasing Superlift products.

Along with our products we are very proud of our first class customer service. At Superlift, we have a dedicated team at the ready to help you find the right solution for your lifting requirements. But if you get a hold of us, we put our belief in the fact that that you're going to get top notch service..

## Custom Solutions for Your Needs

At Superlift we know that an operation is a unique operation. But our application specialists are here to help; working with you to create solutions specific to your specific needs. Wherever you're at on the development path, from needing modifications to existing equipment to entire new design, we are here to help you mitigate your operational challenges with the right fit.

We would of course advise you to call us first on ergonomic concerns. Now we have the professional team to answer any of your questions about our products and how they can help improve the way you work. With our positive attitude and willingness to work together to improve your material handling processes we are sure that you will appreciate working with us.
