What is Competency Demonstration Report (CDR) Assessment Pathway?

A CDR Assessment Pathway is a framework which helps engineering candidates migrate to Australia as professional engineers. It is open to individuals who hold engineering graduate qualifications that do not meet the Australian or international qualification standards outlined in the Washington, Sydney, and Dublin Accords. The CDR Assessment is administered by the professional association Engineers Australia to assess applicants' knowledge and competence through their work and learning.

WHY CHOOSE A CDR ASSESSMENT PATHWAY?

To Migrate to Australia
To get assessed for Knowledge by EA
To Reside in Australia Permanently
To Work in Australia as an Engineer
To Grow and Boost an Engineering Career

WHAT IS A CDR REPORT?

A CDR report is a customised technical report used to demonstrate one's obtained engineering knowledge, talent, and experience through work and learning for skills assessment. The report helps engineering applicants obtain:

The Skilled Australian Immigration Approval

Opportunities to Work Abroad

Opportunities for Career Development

A skilled Migration Visa to Australia

Permanent Residency (PR) in Australia

WHAT ARE THE KEY COMPONENTS OF A CDR?

- 1. A Detailed Curriculum Vitae (CV)**
- 2. A Continuing Professional Development (CPD)**
- 3. Three Career Episodes (CEs)**
- 4. A Summary Statement (SS)**

HOW TO CRAFT A CDR FOR ENGINEERS AUSTRALIA?

To create a strong and compelling CDR application, individuals must follow all the guidelines stated by Engineers Australia. They need to craft three elements of a CDR impressively:

- 1. Write three Career Episodes' narratives demonstrating their engineering education and work experience within their practice area for the nominated occupation.**
- 2. Prepare a Summary Statement that concisely highlights all key elements, with a paragraph number for each career episode where they occur.**
- 3. A CPD Statement displaying the appropriate steps taken by applicants to keep themselves up-to-date with the development in their engineering field.**
