

How to Spot Your Train with RailRestro Train App?

The image is a promotional graphic for the RailRestro app. On the left, a smartphone displays the app's 'Live Train Status' screen, which includes a search bar for 'Enter Train Name or No.', a 'Check Status' button, and a promotional banner for a '₹100 CASHBACK ON FIRST ORDER'. Below the app screen is a circular button that says 'Download the App NOW!'. In the center, the text 'SPOT YOUR TRAIN Using RailRestro' is written in large, bold, orange and white letters. On the right, a photograph shows a woman in the foreground holding a smartphone displaying the app, with a man and a woman in the background also looking at their phones on a train table.

Never forget to spot your train before starting your winter journey. It can be stressful to wait longer at the boarding station because of fog. So, you must check the train status to find the current location and reach the boarding station accordingly.

Winter train travel is not just about travelling by train, but it also comprises other elements such as railway timing, weather, meals, stations and many more. However, running status still plays a key role in winter train travel.

Keep reading this article to understand the benefits of spotting trains before starting your journey. This article will explore the running status to help during the winter journey. It also explores the reason to find your train's live location, the process to track status as per the train schedule and many more.

Spot Your Train in Winter to Reduce Wait Time

You must check your train's live location before reaching your boarding station. Train delays are frequently in winter due to fog. Avoiding it can make your wait longer at the platform. Therefore, use the RailRestro “Train Running” feature to [spot your train](#) and make the journey more comfortable.

Train running status allows us to find the expected delay and arrival/departure time. It is more accurate than the train timetable because it offers real-time information. However, the train time table allows passengers to know the scheduled time, giving less accuracy than the running status. So, real-time tracking can be more effective than scheduled one.

What are Reasons to Spot Your Train in Winter Travel?

There are the following reasons to check the live train running status during winter.

- **Fog and Delay:** Winter is not just about cold; it also brings fog that reduces visibility. Therefore, people are required to find out their train running status to find the real-time location to understand whether the train is running late or not.
- **Busy Routes:** Trains may run slowly during winter to avoid accidents. It can cause issues in busy routes that may cause unexpected delays on busy routes. [Check PNR](#) and find your running status to be aware of the train arrival can help to make potential decisions.
- **Reduce waiting:** Trains can also be delayed due to maintenance work. Low visibility causes delays in maintenance work, which causes longer busy tracks and delays the train running status. Therefore, people are required to check the running status to avoid waiting longer at the station.
- **On-time Arrival:** You may need the spot your train to find the accurate arrival. It can improve your arrival at the boarding station and avoid the risk of missing the train. Moreover, it also helps to keep you updated with the arrival time to reduce the waiting at the boarding station.
- **Informed Decisions:** Follow the train's live status to make your travel plan accordingly. It can help to make your winter travel decisions according to proper decisions.
