

Avoid Festive Delays with Accurate Live Train Running Status

The advertisement features a smartphone displaying the RailRestro app interface. The app screen shows the 'Live Train Status' section with a search bar for 'Train Name or No.' and a 'Check Status' button. Below this is a promotional banner for a ₹100 cashback on the first order. The app also displays a 'Live Train Running Status Enquiry with RailRestro' section, which includes a detailed description of the app's features: 'You can easily check the Train Running Status or IRCTC Live Train Status of all Indian Railways trains with RailRestro website or app. It is one of the quickest means to spot your train and get real-time updates of any train. You can find complete information about the train running status, train's current location, estimated time of arrival and departure, expected delay, and the platform number on which the train is to arrive. If you want to know where RailRestro will help you track your train. RailRestro uses accurate GPS data.' A circular button with a downward arrow and the text 'Download the App NOW!' is positioned below the app screen. The background of the advertisement is a vibrant purple and orange geometric design. On the right side, there is a photograph of a train interior during a festive season, with passengers, including a woman in a purple sari and a child, looking out the window at the lights and decorations.

Avoid Festive Delays With LIVE STATUS

No one likes to get delayed during festive times, but live train running status can help you. So, check the train running status and reduce your travel stress. It can also improve your journey experience by offering comfort on board and upon arrival.

Festive days cause a rush at railway stations because people are looking to go back home, planning trips and many more. It causes high traffic at railway stations, which reduces mobility and may cause delays in boarding.

So, check how to avoid this delay by checking the live running status. This article will explore the benefits of train running status to avoid the festive delays. It also helps to find the actual train timing rather than the scheduled one, and many more.

Live Train Running Status Improving Boarding Experience in Festive Delay

Indian festivals bring joy, family reunion and celebration. Therefore, many people come back home and enjoy the festival to make it memorable. Higher crowd estimation allows for many special trains, but a limited track can cause delays in running. Therefore, you must check the [live train running status](#) before reaching the railway station to improve your boarding experience.

RailRestro offers the “Running Status” feature to check where is your train. It allows you to find the live location of the train and plan your journey accordingly. It improves your time management in reaching the station and helps in finding the expected running delay. So, stay informed to avoid the travel stress during festive times like Holi, Diwali or others.

Why Do Indian Railways Get Delayed During Festive Seasons?

There are various reasons behind train delays during the festive rush, some are below.

- **Increased Special Trains and Limited Tracks:** During the festive season, traffic increases with a high proportion. Therefore, various special trains are scheduled to reduce the overcrowding in trains and offer better seat allocation. However, limited tracks affect the live train running status and result in delays.
- **Longer Halts than Schedule:** During festive times like Holi, Diwali passenger traffic gets highly increased, which requires a longer halt for proper boarding. It delays the train running status during festive times.
- **Weather or Operational Challenges:** Certain weathers like winter fog, rainy seasons, can affect visibility that affect train time. Moreover, operational challenges like track maintenance and signal failure. Check the [PNR status](#) and train running status if it is running late or not.

Reasons to Check Live Train Running Status During Festivals

There are different reasons to check the train's live status during festivals.

- **Avoid Long Waiting:** You can find the expected delay in train arrival by checking the train's live status. It helps to reach our station on time to avoid a longer wait for boarding. It can improve your train experience and reduce boarding stress.
- **Informed Decision Making:** Train live status helps in informed decisions by knowing the actual [train timing](#). It allows you to ensure whether you still like to travel or find an alternate in case of delays.
- **Get Food on Train:** During festive seasons, you may also like to enjoy the festival special food. Here, RailRestro offers more than 2500 restaurants to deliver your fresh and delicious food at 500+ stations. The delivery person tracks the live location and delivers your food to your seat when the train reaches the station.
- **Help in Connecting Journey:** Festive seasons can cause high traffic that affects ticket booking. In such cases, you may be required to find a connecting journey to get PNR status confirmed. Here, train running status can improve your connecting journey experience.
- **Peace of Mind:** Staying updated with information can offer peace of mind. It makes you aware and helps to make your decision accordingly that improves your journey experience and reduces travel stress.

How to Check Train Timing with Live Running Status?

Follow the steps below to check the running status of the train in just a few seconds.

- Download the RailRestro app or reach out to the official website.
- Navigate to the “Running Status” tab available on the homepage and click on it.
- Provide the train number or name and hit the “Check Status” tab.

You can also use the PNR status to find the train name or number to check your status. However, the result offers information like upcoming railway station, expected delay, expected arrival/departure time and others.
